

DTR-HV250
Quick start guide

1 Package Contents

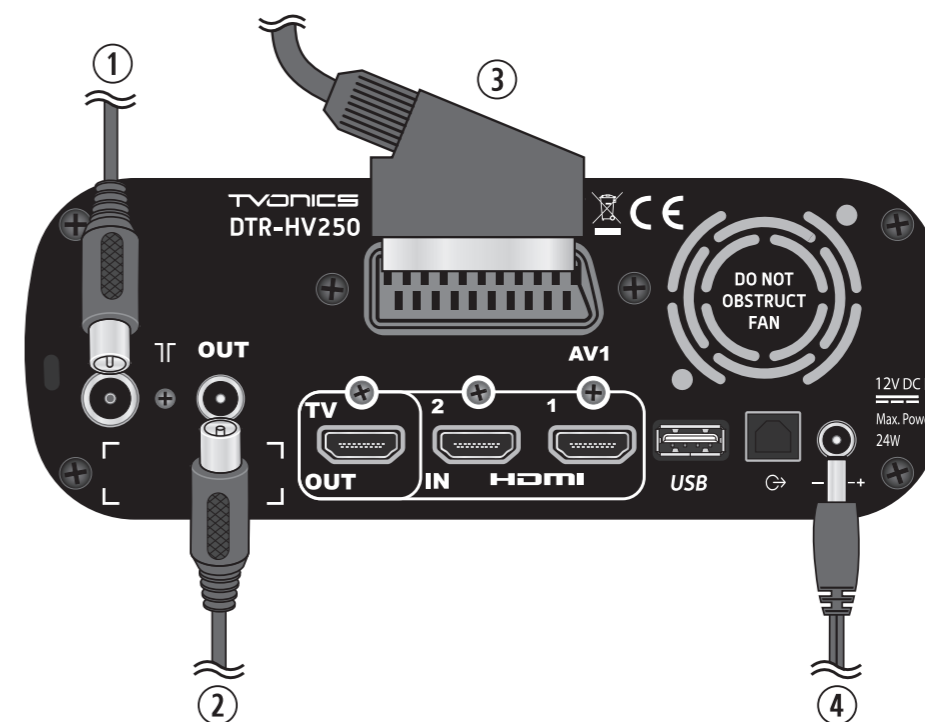

- ① Digital TV recorder (DTR)
- ② Remote control
- ③ Batteries (2xAA)
- ④ AC mains adaptor
- ⑤ SCART cable
- ⑥ RF cable
- ⑦ User guide
- ⑧ Quick start guide

2 Inserting the Batteries into the Remote Control

- Always check the positive/negative symbols on the batteries to ensure they are inserted correctly.
- Don't forget to get rid of old batteries safely. Check with your local council for how you should get rid of batteries. Never put batteries on a fire or in the bin with normal household waste.

3 Connecting Equipment to the Rear of the Recorder

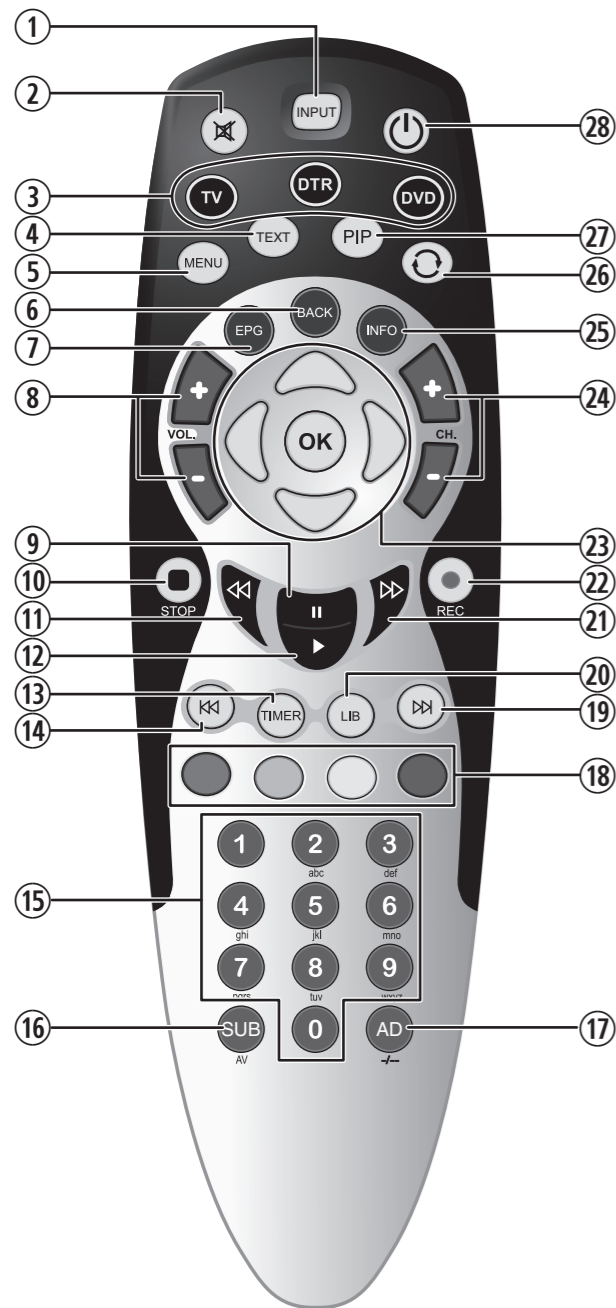

- ① Plug your aerial lead into the **RF IN** socket of the recorder.
- ② Plug the RF cable between the **RF OUT** socket of the recorder and your TV, Video or DVD recorder.
- ③ Plug a SCART cable between the **AV1** socket of the recorder and your TV, Video or DVD recorder.
- ④ Plug the supplied AC mains adaptor between the power socket of the recorder and a standard wall socket. **Only switch on the wall socket when all cables have been attached.**

Please refer to page 9 of the User Guide for information on connecting equipment using a HDMI cable, a USB Flash drive or an audio system using a SPDIF cable.

Automatic Tuning

1. Once you have connected the AC mains adaptor the following menu is displayed. Press **[OK]** to continue.
 - 💡 If the remote control does not work, press the **[DTR]** button and try again.

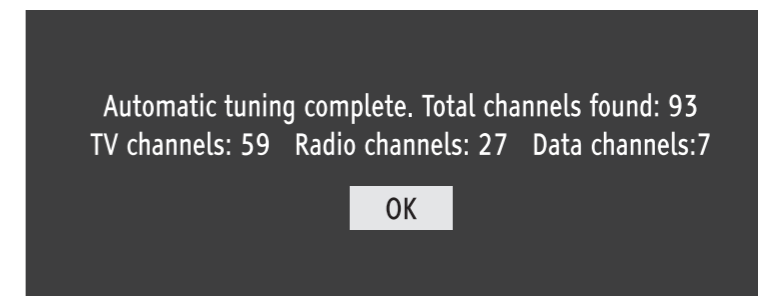

2. The Digital TV recorder will now scan and store all available channels. Depending on the quality of your reception, this may take several minutes. Please be patient and do not press any buttons.

- 💡 If no channels are found a message is displayed asking you to check your aerial. Confirm that your aerial is connected correctly and press **[OK]** to restart automatically tuning.

3. Once the automatic tuning is complete, a summary screen is displayed.

4. Press **[OK]** to exit the automatic tuning process.

Congratulations ! The Digital TV recorder is now ready to use.
